

APPLICATIONS OPEN FOR STEAM CAMPS 2024

The core idea of the project is bringing a new thrilling learning experience for unprivileged children in Nigeria. Main aim is to build in them the hope and conviction of being able to build their future and to reach any type of target or goal they want to achieve, through education and culture. The main task of the members of the project is create and organize several daily activities/lectures.

Subjects that the volunteers will teach are the following:

Arts; Mathematics; Science; Technology; Engineering.

Is important to note that Volunteers will create the programme by themselves, with the aim of providing knowledge to the children through practical jobs and experiments.

Each of the members will have to create a program for the whole month and then carry out the activities of the program every day. Volunteers will stay together during the experience and will be accompanied from/to their accomodation in the morning/evening.

This experience features a unique opportunity both for:

- Volunteers on one hand to contribute in a impactful way to the personal development of Nigerian children born in poor and disadvantaged condition and on the other hand to develop their inner sense of humanity and solidarity
- Childrens to learn several teachings and to understand that through knowledge they can reach a better standard of life and at the same time reach their dreams

Before following the procedure for the application (through the google form) it is suggested to read the informative pdf of “The Peace Institute” which contains all the requirements and info of the project.

After the request of participation, the students will be contacted via email and asked to attend an online interview with Professor Hauwa Ibrahim to select the candidates.
